SUMMARY

Results-driven Full-Stack Developer skilled in building performant, scalable web applications using **React, TypeScript, Flask, Python, and SQL/NoSQL databases**. Strong foundation in **data structures, algorithms, and clean software architecture**, with hands-on experience deploying **AI/ML-driven features**. Demonstrated ability to ship end-to-end products, improve performance, and automate workflows. Seeking roles where I can contribute to **real-world engineering challenges** and deliver measurable impact.

EDUCATION

B.Tech. in Computer Science & Engineering, SRM University, NCR Campus (GPA: 9.00/10) Aug '23 — Present
Ghaziabad, India

PROJECTS

Healthify - Virtual Herbal Garden [Link](#) Sep '24

- Built full-stack platform with React (TypeScript), Flask, and Scikit-learn for plant recognition and disease suggestions.
- Developed an ML pipeline using **HOG features + Random Forest**, achieving **~92% classification accuracy** across 8,000+ plant images.
- Implemented advanced search, detailed plant pages, and interactive quizzes that increased user engagement by **40%** during testing.
- Optimized image preprocessing workflow, improving prediction speed by **30%**.

AI-CodeReview-Assistant [Link](#) Oct '25

- Developed an AI-powered tool to **automate code reviews**, reducing manual review time by **40–60%** for test repositories.
- Integrated tool workflows to support developers with faster review cycles, reducing manual errors.
- Leveraged modern frameworks and APIs to build a seamless developer tool experience.
- Created a developer-friendly UI that cut onboarding time by **50%**.
